rowbyte plexus 3.1.3 I'm trying to get a value from a database field in plexus but I can't figure out how to execute the query correctly. I think the problem here is that rowbyte plexus returns an array, not a field. I am getting the following result when I enter a string into a database field rowbyte row2 = rowbyte.get(row); if(row2 != null) return rowb.toString().trim(row2); I am getting the following error: Could not find an instance of row2. I am using plexus-w3m-3.3.0.jar from database server. I am using JPA (Hibernate). I'm in
