OK.Vaccines for hospital-acquired infections: an update. The incidence of hospital-acquired infections has increased over the last decade. The major challenge is preventing these infections as 70-80% of them are preventable. Vaccination against vaccine-preventable infections is an efficacious strategy in preventing these infections. There is currently an international push to introduce vaccinations into clinical practice. This article reviews the currently available vaccines and discusses issues of maintaining high vaccination coverage rates.Q: how to keep connection in a web service I have a web service that connects with a database through mysql. Whenever I

add a row it is ok, but when I remove a row it disconnects from the database. How to I ensure that a service continues to function even if removed rows are inserted or deleted from the database? Here is the code where I add a row to the database: //To get all the items and add them to a listBox var connection = Properties.Settings.Default.User; var queryString = "select * from I_Report"; using (SqlConnection connection = new SqlConnection(connection)) { using (SqlCommand command = new SqlCommand(queryString, connection)) { using (SqlDataReader reader = command.ExecuteReader()) { while (reader.Read()) { ListBoxItem item = new ListBoxItem();
